

Sun Protection Procedure.

Here at Holyrood Playgroup we take the care of every child seriously this includes while inside and out , and in all weathers. We will ensure that all staff understand the importance of sun protection and are a positive role model to the children in our care by having discussions with the children about their safety in the sun and also wearing suitable clothing and hats.

Please note;

- ~ In high UV levels the children will not be exposed to the sun for more than 15 mins at a time.
- ~ We will encourage the children to play in the shade , especially at peak times of sun heat (between 11.00 - 3.00 pm).
- ~ Outdoor activities will be arranged to allow the children to play in the shade.
- ~ We appreciate that when the sun is out the children want to get out but we have to be mindful of the damage that can happen to a Childs skin if burnt and this doesn't need to be a very sunny day to do this , the damage can happen and will affect your child when they are older.
- ~ The sun emits harmful ultraviolet (UV) radiation , which can damage your skin, in fact any tan is a sign of damage to your skin !!
- ~ We ask that you apply sun cream of at least a factor 30 + to your Childs exposed skin before they come to playgroup and please leave sun cream in their plastic bags so we can re-apply as and when necessary.
- ~ We will do our bit to protect your child so please if you could do the same we can all have a great time outside in the better weather.
